Black&White4 CTM P/CTM P RL

The Black&White4 CTM P / CTM P RL (coffee–tea–milk–powder–refrigerator large) is only 92 mm wider with the powder module than the basic CTM equipment. Hot or cold chocolate is quickly prepared at the touch of a button with this machine configuration. Thanks to technological innovations, the Black&White4 takes coffee enjoyment to a new level – coffee excellence in sieve carrier quality at the touch of a button. The new milk foam technology allows individual adjustment of the milk foam consistency (from stable to liquid milk foam) and the milk and milk foam temperature can be user-defined for each drink. ThermoplanConnect is the in-house telemetry solution that allows the user to make adjustments to the coffee machine from any location. Data can be both read and written to the Black&White4.
