Black&White4 CTM F/CTM F RL

The Black&White4 CTM F / CTM F RL (coffee – tea – milk – syrup – refrigerator large) has with the syrup drawer that certain something fast and at the push of a button output. The aromatic additive gives the coffee/milk drink an individual touch. Thanks to technological innovations, the Black&White4 takes coffee enjoyment to a new level – coffee excellence in sieve carrier quality at the touch of a button. The new milk foam technology allows individual adjustment of the milk foam consistency (from stable to liquid milk foam) and the milk and milk foam temperature can be user-defined for each drink. ThermoplanConnect is the in-house telemetry solution that allows the user to make adjustments to the coffee machine from any location. Data can be both read and written to the Black&White4.
